FACT SHEET 3 – A MOTORCYCLE LICENCE

A MOTORCYCLE LICENCE 595CC+ (24+ YEARS)

The final step to a full power and unrestricted category A licence can be at 21 but **ONLY** if the rider has held an A2 licence for a minimum of 2 years, or at 24 if the rider has a new provisional motorcycle licence or full car licence. The test will have to be taken on a machine of at least 595cc and engine power of at least 40KW (53.6bhp).

If the test is taken on an automatic or semi-automatic machine, the licence will be endorsed with a restriction limiting the rider to driving only automatic and semi-automatic machines.

PRACTICAL TESTS

At the end of your training there will be a Mod 1 off road test lasting approximately 10 minutes involving pushing your bike backwards, a slalom, figure of 8, slow control ride, U turn, a 32mph emergency stop and a 32mph hazard avoidance-controlled stop. Once this has been passed you are now ready for your Mod 2 test. This will be approximately 40 minutes riding in and out of town (just like your car test but on a bike).

IMPORTANT NOTES

You train and are tested on a machine that exceeds 53.6bhp, provided that:

1. You are accompanied at ALL times by a Department of Transport Approved Direct Access Instructor or Examiner.
2. You are in radio contact with your escort.
3. You observe the standard learner regulations; "L" plates, no pillion riders and no motorway riding.

As with CBT training, we can provide you with the motorcycle, fully comprehensive insurance and any equipment (helmet, jacket, gloves etc.), which you might need for the above courses.

JUST BRING YOURSELF AND YOUR PAPERWORK - WE'LL SORT OUT THE REST!
